

Priority Substances to Report

List of substances meeting TRA thresholds for current year:

CAS	Substance	Description of Processes that Use or Create Substance	NPRI Part	NPRI Threshold (tonnes)	2015 Used (tonnes)	2014 Used (tonnes)	% change	2015 Created (tonnes)	2014 Created (tonnes)	% change	2015 CIP (tonnes)	2014 CIP (tonnes)	% change	Quantification Method(s) Used	Rationale for Using Selected Method(s)
67-56-1	Methyl Alcohol	Finishing products, thinners	5	1	1,782	1,718	4%	0,000	0,000	+100%	0,000	0,000	0,000	MB	No monitoring data available.
108-88-3	Toluene	Finishing products, thinners, and cleaning	5	1	8,426	7,128	18%	0,005	0,000	+100%	0,000	0,000	0,000	MB/EF	No monitoring data available.
1330-20-7	Xylenes	Finishing products	5	1	1,633	1,718	-5%	0,000	0,000	+100%	0,000	0,000	0,000	MB/EF	No monitoring data available.
64-17-5	Ethyl Alcohol	Finishing products, thinners	5	1	7,216	6,006	20%	0,000	0,000	+100%	0,000	0,000	0,000	MB	No monitoring data available.
8052-41-3	Mineral Spirits	Finishing products, thinners, and cleaning	5	1	3,321	3,702	-10%	0,000	1,443	-100%	0,000	0,000	0,000	MB	No monitoring data available.
123-85-4	N-Butyl Acetate	Finishing products, thinners, and cleaning	5	1	7,743	7,025	10%	0,000	1,674	-100%	0,000	0,000	0,000	MB	No monitoring data available.
67-64-1	Acetone	Finishing products	2B	3	3,822	3,924	-3%	0,000	0,124	-100%	0,000	0,000	0,000	MB	No monitoring data available.
-	PM 2.5	Finishing products, wood and nat gas combustion	4	0.3	0,000	0,000		1,535	0,000	+100%	0,000	0,000	0,000	EF	No monitoring data available.
-	PM 10	Finishing products, wood and nat gas combustion	4	0.5	0,000	0,000		1,780	0,000	+100%	0,000	0,000	0,000	EF	No monitoring data available.

Process Description / Quantification

Receiving/Inventory - Durham Furniture receives paints including (lacquers, glazes, stains and sealers) as well as solvents and thinners from finishing suppliers. Finishing products and cleaning solvents are stored in closed containers until ready for use. There are no emissions associated with the storage of the finishing/cleaning products during this stage.

Mixing - paints are reduced/mixed with thinners as required. The mixing stage occurs over a relatively short period of time and no significant emissions are expected to be associated with this process.

Spray Painting & Drying - mixed finishing products are applied to the wood products in the facility's spray booths and dried prior to moving to the final assembly processes. All solvents applied during the spraying operations are driven off during either the spraying or drying operations and none continue on as part of the product sent for assembly. A small portion of the finishing products may end up as waste paint throughout the year which is collected and sent off-site for recycling.

Cleaning - finishing gun and line cleaning is conducted using a solvent product which is recovered for off-site recycling. A small portion of the finishing products applied using the guns would also be washed out of the guns/lines using the solvents and would be part of the overall paint/solvent waste sent off-site for recycling.

Assembly, Storage, Shipping - the final finished products do not release any solvents as these are expected to have been driven off during the finishing and drying operations.

Combustion Processes

Wood Combustion - the facility uses clean waste wood generated during wood processing operations to generate comfort and process heat for the facility. Combustion by-products include a small amount of solvents and particulates emitted to the atmosphere.

Input/Output Balance Check

CAS	Substance	Total Inputs	Total Outputs	Balance (% Difference in I/O)	Explanation for no "approximate" balance, if any (≥ 10% difference)
67-56-1	Methyl Alcohol	1,782	1,782	0.0%	n/a
108-88-3	Toluene	8,430	8,435	0.1%	n/a
1330-20-7	Xylenes	1,634	1,634	0.0%	n/a
64-17-5	Ethyl Alcohol	7,216	7,216	0.0%	n/a
8052-41-3	Mineral Spirits	3,321	3,321	0.0%	n/a
123-85-4	N-Butyl Acetate	7,743	7,743	0.0%	n/a
67-64-1	Acetone	3,822	3,822	0.0%	n/a
-	PM 2.5	1,535	1,535	0.0%	n/a
-	PM 10	1,780	1,780	0.0%	n/a

NOTE: Process Flow Diagrams will show quantities transformed and/or destroyed. Not requested for report in Single Windows. Substances released, disposed of, and/or transferred/recycled are reported under NPRI. See 'NPRI' worksheet or associated calculation tabs.

List of Methods of Quantification

Requirement: Use the best available method or combination of methods for tracking and quantifying the toxic substance.

Considerations: 1. How the substance enters the process, what happens during the process, how it leaves the process, and what happens after it leaves the process.

2. Industry Standards
3. Economic Achievability
4. Predictive Monitoring, Continuous Monitoring, Source Testing or Sampling, Mass Balance, Engineering Estimates, Published Emission Factors, Site-specific EF.
5. Any methods required to be used for the purposes of meeting a requirement under federal, provincial, or municipal law.

Input/Output Analysis

- Requirement:**
1. Assess whether the sum of quantities of the substance that are used and created in a process in a calendar year approximately equal the sum of the quantities of the substance that are destroyed, transformed, and leave the process.
 2. Input/Output analysis must be done at the process level.
 3. Data from input/output analysis is not provided to the Ministry. Reporting facility must keep this information as a record at the facility for MOE Inspection purposes.

- Possible Rationale:**
1. Process have numerous process streams, many of which affect various environmental media.
 2. The exact composition of some streams is unknown and cannot be easily analyzed.
 3. Phase changes occur within the process, requiring multimedia analysis and correlation.
 4. Accumulation of the substance may be a cause due to unconsumed/stored material in a process for given accounting period.
 5. Inherent inaccuracy of the data quantification methods.

- Examples:**
1. Limited number of tests available to obtain statistical confidence in test results used in quantification calculations.
 2. Unknowns in physical/chemical reactions (i.e. not all of a substance may be transformed into a toxic substance during a chemical reaction in a process.)
 3. Highly variable feedstock makes it difficult to accurately determine the amount of a toxic substance that enters a process.
 4. Efficiencies based on equipment specifications may not accurately reflect actual operating conditions.

Report Submission and Electronic Certification

NPRI - Electronic Statement of Certification

Specify the language of correspondence

English

Comments (optional)

I hereby certify that I have exercised due diligence to ensure that the submitted information is true and complete. The amounts and values for the facility(ies) identified below are accurate, based on reasonable estimates using available data. The data for the facility(ies) that I represent are hereby submitted to the programs identified below using the Single Window Reporting Application.

I also acknowledge that the data will be made public.

Note: Only the person identified as the Certifying Official or the authorized delegate should submit the report(s) identified below.

Company Name

Durham Furniture Inc.

Certifying Official (or authorized delegate)

Luke Simpson

Report Submitted by

Jim Anderson

I, the Certifying Official or authorized delegate, agree with the statements above and acknowledge that by pressing the "Submit Report(s)" button, I am electronically certifying and submitting the facility report(s) for the identified company to its affiliated programs.

I, the highest ranking employee, agree with the certification statement(s) above and acknowledge that by checking the box I am electronically signing the statement(s). I also acknowledge that by pressing the 'Submit Report(s)' button I am submitting the facility record(s)/report(s) for the identified facility to the Director under the Toxics Reduction Act, 2009. I also acknowledge that the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 provide the authority to the Director under the Act to make certain information as specified in subsection 27(5) of Ontario Regulation 455/09 available to the public.

Submitted Report

Period	Submission Date	Facility Name	Province	City	Programs
2015	11/04/2016	Durham Plant	Ontario	Durham	NPRI, ON MOE TRA, ON MOE

Note: If there is a change in the contact information for the facility, a change in the owner or operator of the facility, if operations at the facility are terminated, or if information submitted for any previous year was mistaken or inaccurate, please update this information through SWIM or by contacting the National Pollutant Release Inventory directly.
